## SPORT NOTES

GOLF FOOTBALL BASEBALL TENNIS

**Lethbridge Trims Kimberley 3-0**  
Crows Nest Pass teams made a quick exit from the Challenge cup play-downs the past week. A week ago Kimberley defeated Michel to earn the right to oppose Lethbridge. On Saturday Kimberley were soundly trounced by Lethbridge 3-0 to eliminate the last Crow team from the competition.

Michel is now endeavoring to enter the Bennett trophy, a provincial competition. Whether a B. C. team will be allowed to enter an Alberta competition will rest with provincial officials at Calgary.

Crowleague matches this weekend finds Kimberley at Michel on Saturday evening and Kimberley at Fernie on Sunday.

### Lethbridge Coronets Here On Sunday

Lethbridge Coronets, provincial senior finalists last season, were just too good for West Coleman Co-Eds at Lethbridge on Sunday as they won both ends of a double-header 9-1 and 13-6.

Not disheartened, Coleman will have the opportunity of taking revenge this Sunday at the local ball park when Lethbridge will return the visit. First game is scheduled for 2:30 p.m. and the second for 6:30 p.m. Marj Kubica and Mary Mahovitch will form the battery for Coleman.

Co-Eds have forwarded their entry fee to the provincial authorities for the intermediate softball play-off. They expect to play their first game against Medicine Hat early in August. In trying to bring a championship to Coleman, Co-Eds are deserving of all the financial support fans can give them and a goodly number are expected to attend Sunday's games.

The meeting of mine workers held last Saturday decided to advertise in Vancouver and Calgary newspapers for applications for doctors to fill the places of Doctors Borden, MacLean and Sweeney, whose resignations take effect on July 16.

### Sports Meeting To-Night

A meeting of all sports fans, under the leadership of Coleman Elks, will be held in the council chamber to-night at 7:30 for the purpose of devising means to improve the sports field.

The sports field, which undoubtedly needs improvements, has for a number of years been a sore point of dispute due to its rocky condition and unevenness. Baseballers, softballers and footballers will have the opportunity of discussing proposals for needed improvements and at the same time give the Elks support in their endeavor to make a sports field worthy of the town.

### MISCELLANEOUS

Resignations of Miss Gwen Brown and Miss Gladys Higginbotham have been received by the school board. Their marriages will take place in July.

The Journal office has new neighbors, Mr. and Mrs. S. Penny sr. having purchased the cottage next door from Geo. Pattinson.

Colemanites seen at Waterton on Sunday were Mr. and Mrs. W. Clark sr., Mr. and Mrs. G. Clark, Mr. and Mrs. J. Richards, Mr. and Mrs. H. Davies and family and Mrs. Joyce.

Mr. Atkinson and daughters Isabel and Mary, and Audrey Halliwell, motored to Kimberley on Sunday. Mr. Joe Spiveak being the skilful pilot of the car, assisted by back seat drivers.

**IMPORTANT!** Any person having in his possession a .22 rifle and who has not yet been called on by the police, is requested to advise Chief Ande at the town office or bring the rifle for inspection. Co-operation in this request will be appreciated.

Jim McCool, in from Natal, in reply to an enquiry as to how he was feeling, replied: "Damned sick." He had fallen into a cellar, causing many bruises and cuts on his head. But Jim is one of the type who would rather be standing up than in bed, though he was advised to go into hospital.

The recklessness of Premier Aberhart in attempting to contravene Federal laws demonstrates his defiance of Federal authority. Having failed in implementing any one of his promises of three years ago, he throws the blame on everyone but himself. It is a well-known fact that abuse is the refuge of those who cannot take defeat gracefully, or when their reasoning is shown to be absurd.

The Misses Ethel Wilson and Margaret Allan will leave shortly on a two months vacation to the British Isles, where they will visit relatives and friends. While in Scotland Miss Allan will attend the Empire Exposition being held at Glasgow. Miss Wilson will visit relatives near London. Her sister, Violet, has been over there for more than a year, and is employed at the offices of Lever Bros., Purfleet, Essex.

### Strawberry Tea

The Ladies Aid of St. Paul's United Church will hold a Strawberry Tea on the afternoon of Tuesday, June 28, at the home of Mrs. T. Bowen, 5th Street. Weather permitting, tea will be served on the lawn from 3 till 6 o'clock. Tea 25c. Everyone is cordially invited.

### Silver Wedding Celebration Of Well-Known Coleman Couple

Married in St. Alban's church 25 years ago by the Rev. Mr. Jones, Mr. and Mrs. David Sudworth commemorated their anniversary on June 18 at their home. Fifty guests were present, and many beautiful gifts were bestowed on the honored couple including an electric coffee percolator from the family.

The same evening the wedding of Kathleen Marconi and John Makin took place at the Sudworth home. The bridegroom is a nephew of Mr. and Mrs. Sudworth.

Good wishes are extended to both couples for continued happiness.

### Returning to England

In honor of Mrs. Westworth, sr., who during the past year has been visiting her son, A. B., and Mrs. Westworth, a number of teas and parties were held during the past two weeks. They will leave next week for Montreal, sailing from there for England. She will join a party of tourists on the train here who completing a visit to the Dominion which took them to the Pacific coast, and they will return east via the Great Lakes, visiting points of interest, including Niagara Falls.

### Nazarene Mission

Sunday school with classes for all ages at 11 a.m. Evangelistic service, 7:30 p.m. Prayer meeting, Tuesday at 7:30 p.m. Gospel service on Friday at 7:30 p.m.

On Saturday the first annual Sunday school picnic will be held at Crows Nest Lake; meet at the mission at 10:30 a.m.

The tent campaign meetings continues to-night and Friday. Evangelist Lawlor's subject to-night will be "The Second Coming of the Lord," and on Friday night, "The Modern Prodigal."

### Relief Commission in Pass Towns

Mrs. Gostick, Dr. Robinson, chiropractor, and A. V. Bourcier, who are being paid eight dollars a day and expenses to listen to complaints of unemployed people, will some day publish a report. What then?

This is the commission which a delegation of Calgary unpursued in Saskatchewan. Premier Aberhart's "bouncers" met the delegation out in the cold at his Melville meeting.

### TRAITORS TO CONFEDERATION OF CANADA

In no part of Canada is it so discreditable to sow such seeds of dissension as on the western prairies. Here we have a population drawn from all parts of the world, some of inflammable temperament, responsive to any suggestion of oppression. Quite a proportion of these people know nothing of Canada beyond the little spot in the West in which they have located. There has never been any presentation made to them of the history of Canada, its early settlement, and the grandeur of its spirit and accomplishment. Instead, in recent days, they have been fed consistently with propaganda, picturing Ottawa as a cruel overlord, a ruthless tyrant, an oppressor of the masses. Those who seek so to distort the foundation of our national union, are traitors of their country.—High River Times.

### Early Morning Fire Loss of \$2,000

Absence of Wind, and Rain Prevents Spread to Other Buildings.

Shortly before 6 a.m. Wednesday morning Mrs. H. E. Gate was awakened by the smell of smoke, and on arising to find the cause, was almost staggered to find that the garage and storehouse of Holyk's Store on the next lot was ablaze. Quickly giving the alarm, inmates of surrounding houses were quickly out of bed, for the fire was too close for comfort, and fears were expressed for their own property. Councillor Fred Antrobus was on the spot, as his shoe store would have been in danger had the fire spread, besides dwellings which are closely packed on this block.

The fire brigade did excellent work, stated John Holyk, though the garage, truck and a carload of flour in storage were damaged beyond salvage. The estimated loss is \$2,000, partly covered by insurance. Despite the temporary disorganization caused by the fire, the store opened on time as usual, fortunately the store building was not damaged. Heavy water pressure quickly extinguished the blaze.

### A Dog's Life

Its tough to lose a pal, e'en though he be almost deaf, dumb and blind. After 14 or 15 years companionship as a family pet, "Vic," collie dog which has seen the Flynn family grow from childhood into the adult sphere, was mercifully put to death last week and his master with saddened thoughts buried him on the hillside. He has gone where the good doggies go.

IN THE SHADOW OF MOUNTAIN WANDERLAND—NEXT TO TURNER VALLEY OIL FIELDS

CALGARY'S 53rd ANNUAL EXHIBITION

## CALGARY EXHIBITION AND STAMPEDE

JULY 11th to 16th, 1938

6 THRILL PACKED DAYS FOR YOUNG AND OLD—One of Canada's greatest, most spectacular shows; Bringing breath-taking stampee sports with the world's most daring cowboys competing for championships. E. L. RICHARDSON, General Manager

ADMISSION—Grounds, 25c. Grandstand: Afternoon, \$1.00; Evenings, 75c; Bleachers: only, 50c

### Coleman to be Represented at Cranbrook Tennis Tournay

Bill Balloch, who represent Coleman Club at the tournament being held in Cranbrook to-day and continuing until Saturday. The tournament for the West Kootenay championship attracts players from all over the Kootenays and the Spokane district. The present singles champion hails from Spokane.

Dick Shone was the only Canadian left in the singles tournament last year, reaching the semi-finals before bowing in defeat to the ultimate winner.

Chick Roughhead, Duke Kwannie and Frank Creggan may also represent the local club.

Coleman expects sending strong senior and junior racquet wielders to the Lethbridge tournament which will be held to wards the end of July. Balloch and Jenkins will attend the provincial tournament being played on Banff Springs Hotel courts during the first week of August. Shone, a general favorite at the provincial tournament in past years, is still undecided if he will attend.

### Local News

Mrs. Russell Vincent and daughter are visiting Mr. and Mrs. Campbell at Erikson, B. C.

Mrs. R. Larson and two children, of Raymond, are the guests of Mr. and Mrs. R. Davidson.

Miss Mary Craig, who has been attending Garbutt Business College, is leaving for Macleod where she has accepted a position.—Lethbridge Herald.

Mr. and Mrs. James Ford returned from High River, after visiting Mr. and Mrs. A. L. Watkins for several weeks. Mr. Ford is improved in health.

Subscription is acknowledged from Mr. R. J. Dinning of Edmonton, who was widely known throughout Alberta as commissioner of the liquor board for many years.

Joe Lipovski of the Coleman hotel has made considerable improvements by installing hot and cold water in many of the rooms, and additional bath rooms, thus bringing the building up to a modern standard.

McKeen Hunter writes from Calgary asking that his copy of The Journal be forwarded to Springfield, N. S., where he will spend a month or two. He is one of the early-timers of Coleman, and in recent years has been living in Calgary.

Mr. Albert Duncan, M.A., of Banff, and his brother Norman, who edits the Banff "Crag and Canyon," weekly newspaper, visited Mr. and Mrs. Davidson on Monday and Tuesday. They were on a trip from Banff through the Crows Nest Pass and the Windermere highway.

The Journal acknowledges renewal subscription of Mrs. Mary Neil, Kettle Valley, B. C. She has been for 17 years a subscriber to this paper, one of the many who through the weekly arrival of the old home town newspaper keep in touch with old friends and the local news.

Mrs. J. Richards and Mrs. W. H. Garner were joint hostesses at a shower given in honor of Miss Mary Marconi, bride-elect, on Friday evening. Whist was played, six tables being in play, prize winners being Mrs. V. Collagrosso, Mrs. O. Smith and Mrs. Davies, the latter of Hillcrest. Following a delicious luncheon the bride-elect was presented with a number of lovely gifts. Miss Marconi was married to Mr. J. Makin of Hillcrest on Saturday.

### Hockey Club to Sponsor Semi-Carnival--Aug. 6-8

Tickets on Major Prizes to be Sold Through Mines—Executive Optimistic Over Prospects of Strong Team.

Canadians' hockey executive announced this week August 6 and 8 as the dates for drawing the G. E. Refrigerator and Chesterfield prizes, on which tickets have been on sale for the past two months. Fit boss Alan Brown, of International Co., and J.O.C. McDonald, of McGillivray Co. will sell the tickets through their respective mines.

Some misunderstanding has arisen over the tickets. Each ticket has a chance at each of the ten prizes. On Saturday evening, Aug. 6, the refrigerator will be drawn for. Should your ticket not be the lucky one it remains in the bin and still has a chance to be drawn on the Chesterfield, Aug. 8. Should it still not be drawn it remains in the bin and has a chance to be drawn on one of the eight season ticket prizes, so that each ticket holder has a chance at one of the ten prizes.

In conjunction with the drawing, which will be held at the arena, will be several booths and a jitney dance. Booths will include bingo, hams and bacon, flour, sugar and miscellaneous groceries. All prizes will be purchased from local merchants.

Prospects for a strong team next year are exceptionally bright. Two new players are already in town and the executive, with the help of a western coach, who gained Dominion-wide fame during the past season, are hot on the trail of a top-notch centre. Announcement concerning this player coming to Coleman should be known within the next few weeks.

Burnett, of Kimberley, has as yet failed to forward his answer to Coleman's proposal appointing him player-coach to the Canadians. Should Canadians be successful in securing his services they would be indeed fortunate. Burnett is only 25 years of age and at the height of his playing career. Teamed with Joyce, and with Kemp in goal, Canadians would have a defence second to none in Western Canada.

### Fine Photographic Work by Blaimore Photo Studio

T. Gushul and son Evan of Blaimore Photo Studio have been taking pictures of various buildings in the district this week for publication in The Journal, which will appear in the Dominion Day issue as a special supplement. Evan Gushul has done some very fine work in color photography, and was granted a diploma by the National Art School of Chicago, Ill., he having completed the course in coloring and miniature oils.

Mr. Gushul and son recently purchased a photo engraving plant for making cuts from their photographs, placing them on a par with the cities for producing cuts for newspaper publication.

When they have their plant in operation cuts produced by their plant will be published in this paper and also the daily newspapers of the province. It will enable them to give up-to-the minute service and they are to be commended on their enterprise.

Mr. Ken Blain of Kimberley was in Coleman during the week-end visiting Mrs. Blain and son.

PLUG SMOKING TOBACCO

### A Vital Issue

With the march of time and as the question becomes increasingly ventilated in the press and on the public platform evidence emerges that many conflicting viewpoints will have to be reconciled or compromised before the Canadian constitution is amended or redrafted to the satisfaction of the people generally.

Until the report of the Rowell Commission on Dominion-provincial relations is published it is conceded that little action can be taken, as the country is generally of the opinion, that considerable weight will have to be given the commission's recommendations, whatever they may be, before the first steps towards the revision can be taken.

No doubt it will be some time yet before the Commission is ready to give a considered opinion on a topic of such great importance when it is remembered that widely varying opinions have been submitted to that body to date and when the fact is taken into consideration that their decisions, if implemented, are going to involve the future welfare of the entire nation for many generations to come.

Even after the Commission has submitted its findings to Parliament, there can be little doubt that some considerable time will have to be devoted before public opinion can be sufficiently crystallized to enable the representatives of the people to decide what program should be followed if the desired objectives are to be achieved.

### Must Retain Fundamental Principles

The course that must ultimately be pursued, if the amended constitution is to be really effective, must not only reconcile a wide range of opinion, but must ensure that the new instrument is sufficiently elastic to enable it to meet future requirements in an age of changing viewpoints and of rapid progress and yet must be stable enough to ensure the retention of certain well established, fundamental democratic principles.

Having in mind these facts, or rather, these requirements, those who have had the privilege of hearing or reading the addresses which have been made recently throughout the West by Vincent C. MacDonald, Dean of the Law School of Dalhousie University, cannot fail to have been impressed with the immensity of the task ahead, of the far-reaching effects of the decisions which will ultimately be made and, therefore, of the necessity of the work being placed in the hands of men who will not be swayed by political considerations of the moment, but who are capable of bringing to bear wisdom, capacity, vision and courage.

Some of the fundamental principles which underlay the act of union and which must be incorporated in a revised constitution, as Dean MacDonald says, are the preservation of minority rights and retention of provincial autonomy.

The necessity of maintaining these two important principles can readily be understood in the light of the necessity of providing for a revised constitution which will meet with the approval of all sections of the country.

While in any democratic regime the will of the majority must prevail, at the same time there are minority groups who have been accorded rights and privileges, and provision must be made for their continuance if harmony is to reign. When it is made abundantly clear that there is no intention of doing anything else but safeguard such rights some of the opposition to constitutional amendments will disappear automatically.

### Obstacles To Overcome

Instanting some of the problems which have to be solved before a satisfactory revision can be implemented, Dean MacDonald pointed out that there are several obstacles to be overcome before even the necessary initial amendments can be made operative.

The first of these is the fact that the British North America Act is a statute of the Imperial Parliament and it is impossible to change it except through that Parliament. The second is the political theory that Confederation is a contract and that, therefore, the terms can be changed only with the consent of all provinces—something so far impossible. The third is the difference of opinion regarding the method of changing act.

The last-mentioned, itself, is a bone of contention comprising many views which will have to be harmonized or compromised. For instance, as Dean MacDonald pointed out, there are some people who believe that Canada should get whatever amendments are required immediately. "Others would first secure the power to amend the act so that amendments can be made as they are required. Connected with this is the fact that some believe the power to amend should be acquired by Canada so that amendments could be made here while others believe the amending power should remain in London."

Enough has, however, been said to give point to the comment that the task is a big one and that the decisions which may be reached are bound to be of immense import to the future welfare of the Dominion. On these results hinge the future happiness and prosperity of a young and vigorous nation and the contentment of millions now living and millions yet to be born.

### Music As Unifier

Music, Sir Hugh Robertson told the Association of Canadian Clubs, is the best "unifier" Canada could have. The distinguished adjudicator and director of the famous Orpheus Choir suggested members of Canadian Clubs throughout the Dominion might aid in the propagation of culture, a difficult problem in a new country.

Speed King (as he slowed down a bit): "Gosh! Don't you feel glad you're alive?" Passenger: "Glad isn't the word. I'm amazed."

### Famous Soilless Farm

Has Produced Its Fourth Successful Crop On Wake Island

Wake Island's famous soilless farm, built to provide fresh vegetables for maintenance men and Pacific Clipper passengers and crew members making a scheduled stop there on their flights across the Pacific, has already produced its fourth successful crop, Pan American Airways reports.

During the first ten days of May 33 pounds of tomatoes, 20 pounds of lettuce, 20 pounds of string beans, 15 pounds of squash and 44 pounds of corn were harvested from the shallow water-filled trays in which the crops are grown.

Wake Island's "farm" is cultivated according to methods worked out by Dr. W. F. Geriecke of the University of California. In hydroponic farming, as the method is called, water containing essential minerals takes the place of soil. High yields of vegetables can be grown in surprisingly small areas. Wake Island's small area and the expense of shipping or flying in food supplies make adoption of the system there imperative.

### HARD LUMPS CAME ON HER LEGS

Ankles and Feet Swollen With Rheumatism

Rheumatism sent this woman to bed with lumps, swellings, and inflammation. Yet these symptoms soon disappeared, as they always will do when the root cause is removed. This letter tells you the method used—

"I was taken ill with terrible rheumatic pains in my legs. They were badly inflamed, swollen, and they were partly covered with red, hard lumps. To put my foot down to the ground was agony. After I had been in bed for 10 days, suffering agony all the time, my husband said, 'You can't go on suffering like this, let us try Kruschen Salts.' He got a bottle, and almost from the first I felt benefit. Before long, I was completely relieved—swellings, inflammation, and lumps all gone—and I am up again and doing my housework." (Mrs.) E.L.

Do you realize what causes a good deal of rheumatic pain? Nothing but sharp-edged uric acid crystals which, forming as the result of eliminating organs, Kruschen Salts can always be counted upon to clear those painful crystals from the system.

### A Perfect Quartz Crystal

One Of Largest And Finest Was Mined In Brazil

Ending a journey of more than 7,000 miles on mule-back, boat and railroad, a sixty-three-pound perfect quartz crystal, one of the largest and finest ever mined, arrived at the Busch & Lomb Optical Company, Rochester, N.Y., from a mine in the province of Minas Geraes, 1,500 miles from the Brazilian seacoast.

Found in a region famous for its gem stone output, this giant crystal of quartz a doxioz of silicon chemically identified with ordinary sand, will be used in the manufacture of special lenses for microscopes. Quartz, unlike glass, passes ultraviolet light, commonly used to obtain extreme magnifications. Scrap quartz of high quality, left over from lens and prism manufacture, is used as part of the "melt" in making optical glass.

### Teach Aerial Navigation

Diploma Course Established By The University Of Toronto

Establishment of a diploma course in aerial navigation was announced by the University of Toronto. Honor matriculation will be necessary for admission to the course, which begins October 1.

Instruction in mechanics applied physics, chemistry and other studies will lead to qualifying examinations for commercial and transport pilots, navigators, dispatchers, operating meteorologists and radio operators. The course will cover two years.

Applicants must be British subjects and qualify under physical standards set by the Department of Transport. Before beginning his second year, the student must have obtained at least a private pilot's certificate.

### Millions Of Refugees

There are now 60,000,000 civilian refugees in China, Colonel Theodore Roosevelt, national chairman of the United Council for Civilian Relief in China, estimates. Most of these, he said, are without food and "facing epidemic constituting the greatest health danger that the world has known since the black death of the middle ages."

The population of Wales, which showed a steady increase for 120 years has been decreasing for 16 years.

### The King's Gift To Boston

Oak Sapling From Windsor Park To Be Planted

An oak sapling from Windsor Park, a gift of the King, will be planted on Boston Common, in Massachusetts. It is being carried to the United States by representatives of all ranks of the Honorable Artillery Company, who will take part in the three-hundredth anniversary celebrations in Boston of their regimental offspring, the Ancient and Honorable Artillery Company of Massachusetts, which was founded in 1638 by a London member of the H.A.C. who sailed to New England with the Pilgrim Fathers.

Last summer a delegation from the American regiment came to London to honor the four-hundredth birthday of the H.A.C.

The King is a member of both regiments. Captain General of the H.A.C. and honorary member of the Massachusetts company, and his gift of an oak sapling will be accompanied by a bronze tablet bearing the Royal Arms and a suitable inscription.—Manchester Guardian.

### Giant Airplane

United States Army's Newest Bid For Air Supremacy

A land plane, capable of flying to Europe and back without refueling, is a guarded military secret at the Douglas Aircraft plant in California. The formidable bomber is the army's newest bid for air supremacy.

Aviation circles are confident the new Douglas, when completed, will span almost 250 feet from wing tip to wing tip and will weigh about 160,000 pounds.

That would be nearly twice the wingspread and thrice the weight of any land plane yet built. That also would be the answer to the United States' military need of long-range striking forces in the air.

If adapted to peacetime use, the plane would be in the 100-passenger class of airliner.

Largest land plane in the world to date is the army's Boeing XB-15, with a wingspread of 150 feet and gross weight of more than 60,000 pounds.

### ROBE YOURSELF FOR THE BEACH

You need extra glamour when you step out of the water on to the beach. Something say to fling around your shoulders and reflect color into your face—a gale robe like Pattern 4781, for instance! There's plenty of swirl and loveliness in this design. It flatters the waistline in the clearest way, making it seem far smaller than it is. In a cotton seersucker or other wrinkle-resistant cotton, this new beach-combing triumph will see you smartly through long, happy hours of lounging and sunning. Order the design to-day. You'll marvel at how quickly you can complete it.

Pattern 4781 is available in misses' and women's sizes 14 to 20 and 32 to 42. Size 16 takes 4 1/2 yards 36-inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175, McDermott Ave. E., Winnipeg.

Old Maid—"What kind of a husband have you got?" Newlywed—"Oh, he will wash up when requested and dry up when ordered."

## "JUST ACROSS THE STREET..."

Yes... they're using Gyproc in that new building—all the interior walls and ceilings. The contractor knows that more and more people are using Gyproc as they learn about Gyproc's many advantages; that it won't crack or sag or warp; that it's made from fire-proof mineral gypsum; that it is permanent. Gyproc is as easy to cut and nail as lumber. Saves time and expense in construction, with no muss or bother.

Yes, I asked him about that—the joints are invisible—the finished walls and ceilings are absolutely smooth—perfect for any type of decorating. A free booklet tells all about Gyproc for new buildings. Write us to-day.

### Selecting Art Exhibits

Canadian Paintings And Sculptures Will Be Shown In London

An exhibition, "A Century of Canadian Art," representing Canada's achievements in painting and sculpture during the past 100 years, will be held at the Tate gallery in London this fall, it is announced by Vincent Massey, Canadian high commissioner. The exhibits are to be selected in Canada and will be shown at the gallery for two months from Oct. 14. The Duke of Kent has accepted an invitation to open the exhibition. An advisory committee composed of the presidents of the Canadian artists' societies has been collaborating with the National gallery in selecting the works to be shown. About 200 pictures and pieces of sculpture will be included.

### Not Very Dignified

May Be Reason Elderly Man Discontinues Favorite Stunt

W. Maurer, a retired farmer of Dale, N.Y., was persuaded recently to forgo his customary birthday stunt of standing on his head. He is 83 years old. It is not reported just how Mr. Maurer was persuaded, but the classic presentation of the negative in a precisely similar situation runs: "You are old, Father William," the young man said, "And your hair has become very white; And yet you incessantly stand on your head—Do you think, at your age, it is right?"—New York Times.

### Will Need Them Later

Educational Leaders In China Not Deterred For War

While China has a sufficiently large reserve of arms to last two years, she refuses to draw on the ranks of students and educational leaders to man the guns, Rev. Dr. A. E. Armstrong, chairman of the United Church's foreign missions board, told Montreal and Ottawa conference.

Such men, he said, are not permitted to enter the army because they will be used after the war to direct vast reconstruction work.

Of Tibet's 3,000,000 population, some 575,000 are priests.

### Ride Burning Plane

Riding a burning airplane to earth at Ontario, California, Pilot Carl V. Darnell and three companions escaped unharmed from the wreckage. Engine backfire ignited the fuselage. Darnell shot off the ignition and side-slipped leeward from 200 feet altitude. The plane landed in a plowed field and overturned. It was destroyed by fire.

Among the natives of one tribe in New Guinea, shells worth 25 cents are the standard price for wives.

## Vancouver Jobless In Public Buildings Dispersed By Police

Vancouver.—Apparent quiet settled in Vancouver after unemployed broke two windows in the city police station scarcely nine hours after 35 of their fellows went to hospital from an early morning riot.

Special squads of police who remained on duty during the day were sent home. Officials said they expected no further trouble.

Scores of downtown store fronts were boarded up, aftermath of an orgy of window-smashing by 300 unemployed after they had been evicted from the central post office by police tear gas and riot sticks.

The jobless had occupied the post office and civic art gallery since May 20 in an effort to bring before government authorities their demands for a relief works program. The art gallery group of 200 dispersed quietly after tear gas was used.

Orders to evict the unemployed came suddenly after a month of quiet. Premier T. D. Pattullo said in Victoria he had told Dominion and Vancouver city officials the situation in Vancouver could "not be tolerated any longer."

The post office group, most of them members of the Relief Project Workers' Union, were driven from the building by Royal Canadian Mounted Police and city police after they had refused to leave voluntarily.

As they streamed from the building, city police outside tried to arrest men they believed responsible for breaking post office windows and glass wickets when the disturbance first started.

A fight began on the street. Police low scores who ran down Hastings low score who ran down Hastings and Cordova streets toward the east end of the downtown district.

Jobless wielded any hard object they could grab, smashing store fronts right and left as they raced down the streets. Thirty-nine business houses suffered glass breakage. Most seriously affected were David Spencer, Ltd., where almost every window on Cordova street was broken, and Woodward's Store, Ltd., where every pane of glass in show windows was smashed.

Damage was estimated at many thousands of dollars.

Three of the unemployed injured in the morning riot were detained in hospital for further treatment. So were two police officers. Most seriously injured was Constable Edgar Hembling, who suffered a possible fractured skull.

The other policeman, Constable John Davies, had a possible fractured leg.

Steve Brodie, leader of the unemployed in the post office group, was taken to hospital with head injuries and bruises. Robert Redeth suffered eye injuries and bruises, and Robert Porter was ill with tear gas poisoning.

Condition of all those hurt was said to be good. The rest of the injured were released after emergency hospital treatment.

"We will not allow any further demonstrations in public buildings," the mayor said. "Any such move by the unemployed will bring immediate police action."

### Dies In Office

Barnsley, Eng.—Herbert Smith, 75, president of the Yorkshire Miners' Federation, died in his chair at Federation headquarters here.

## Yellow River Flood Brings Death And Disaster To China

Shanghai.—The Yellow river flood, fed by a steady downpour of rain unrolled a ribbon of death and disaster 10 to 20 miles wide and 50 miles long across the flat plains of Honan province. Chinese and Japanese armies locked in combat on the Peiping-Hankow front fled before the torrent which Japanese now estimate will take a toll of 50,000 lives.

Advices from Hankow, the provisional Chinese capital, said the relentless flood surging southward from torn dikes had penetrated beyond Eukow, 70 miles south of Kaifeng on the Lunghai railway and 90 miles south of the Yellow river.

Sweeping over thousands of acres of farmland, driving peasants and armies before it, the flood was declared by Japanese despatches to

### Taking Over New Job

#### Sir John Reith Appointed Chairman Of Imperial Airways

London.—Sir John Reith, director-general of the British Broadcasting Corporation, was appointed chairman of Imperial Airways to speed up the development of Great Britain's civil aviation.

Sir John Reith is 48. Born in a Scottish manse, he began life as an engineering apprentice in Glasgow. In 1913 he went to London as an engineer and after the outbreak of the war went to the front with the rank of major.

He was wounded and returned home to undertake government work. His association with BBC began in 1922.

A gossip writer in the Star said the name of Major W. E. Gladstone Murray, general manager of the Canadian Broadcasting Corporation, was being mentioned among others as a possible successor to Sir John Reith as director-general of the British Broadcasting Corporation.

### War Debt Payments

#### Total Of Defaulted Payments To U.S. Reach Large Sum

Washington.—Unless an unexpected cheque turns up, the United States will enter an additional \$211,000,000 in the "overdue" column of its war debt ledger.

This will bring to \$1,890,500,000 the total of defaulted instalments on the debt.

Great Britain advised its \$85,670,000 half-yearly payment now due would not be forthcoming, but promised to discuss settlement of the debt whenever "circumstances are such as to warrant hope that a satisfactory settlement might be reached."

### To Popularize Eggs

#### Publicity Campaign Proposed To Assist Poultrymen

Ottawa.—A publicity campaign to make Canadians eat more eggs was urged in the House of Commons by Harry J. Barber (Cons., Fraser Valley). He said poultrymen's associations were asking the government to spend \$100,000 to popularize egg-eating and supported the proposal.

Consumption of eggs in Canada had dropped 45 carloads a week in recent years.

Agriculture Minister Gardiner said the matter was receiving attention.

### Opposes Sweepstakes

Ottawa.—Sweepstakes are detrimental to the nation and to the individual according to the settled experience of mankind down through the centuries, Rt. Hon. R. B. Bennett, Conservative leader, told the House of Commons as he opposed the bill to legalize lotteries for the benefit of hospitals and universities. The bill was before the house only a few minutes at the end of the private bills hour.

### Empire Exhibition Attendance

London.—A total of 2,945,752 visitors from all parts of the world have visited the empire exposition which opened early in May at Glasgow. Lieut-Colonel John Colville, secretary of state for Scotland, announced in the House of Commons.

### Would End Bombing

#### Premier Chamberlain Makes Statement Regarding Royal Air Force Bombers

London.—Great Britain is prepared to abandon policy of bombing if it stands in the way of an international agreement to abolish bombing from the air.

As he made the announcement in the House of Commons, Prime Minister Chamberlain was emphatic in agreement to abolish bombing from the air.

Bombing never was resorted to unless 24 hours' notice was given to enable tribesmen and their families to evacuate the areas.

"Is the prime minister aware," questioned George Lansbury, Labor, "that during debate in the Indian legislative assembly a member commented very emphatically most of the statements the prime minister has read as to the manner in which the bombing was carried out?"

"Will he tell the house where the people are to go when they have to evacuate their homes in the villages?" Mr. Lansbury further questioned. "Is it not a fact that villages, cattle, and the whole of the people's property have been destroyed?"

### Investigation Planned

#### For Social And Economic Conditions In West Indies

London.—Sir Arthur Richards, veteran colonial administrator, whose main experience was gained in the far east, was appointed governor of Trinidad, Jamaica, a few hours after Colonial Secretary Malcolm MacDonald announced in the House of Commons a royal commission would be appointed to investigate social and economic conditions in the general West Indies.

Mr. MacDonald disclosed the inquiry would concern not only Jamaica, but also Barbados, British Guiana, British Honduras, and the Windward and Leeward Islands.

"We do not want a shummy empire," declared David Lloyd George in urging the government to probe fundamental sources of West Indian disturbances.

Sir Arthur is 53 and has been in the civil service 30 years. At present he is governor of Fiji and high commissioner for the western Pacific.

### Ceremony Interrupted

#### Delegates Paying Tribute To Poet Were Challenged By Farmer

Aylmer, Que.—An irate farmer with a shotgun interrupted a solemn ceremony, attended by some of Canada's leading poets, held under the pines at "Brotherhood Wood" near here as a tribute to the late Archibald Lampman, one of their most brilliant fellow craftsmen.

The poets attending the Canadian Authors' Association meeting in Ottawa came shortly after midnight to the grove where Lampman found inspiration for some of his noted works.

Suddenly the solemn communion was shattered by an excited farmer with a shotgun bursting in on the gathering to demand the "trespassers" leave his property.

The purpose of the meeting was explained. The farmer's anger subsided but he remained, gun at hand.

### LLOYD GEORGE INSTALLS IRRIGATION PLANT

Lloyd George, Britain's Wartime Prime Minister, apparently became so perturbed about the lack of rain in England this spring he installed a special irrigation plant which keeps his farm produce well watered. In the picture Mr. Lloyd George and his wife, Dame Lloyd George, watch the plant in operation after the inaugural ceremony.

### THE RANCHER EARL

The Earl of Egmont, who was born on the Prairies and still farms in the West, photographed as he arrived at Southampton for a visit to his English estates.

### Sudeten Demands

#### Conciliatory Measures May Be Taken By Czech Premier

Praha, Czechoslovakia.—Cabinet ministers examined a revised list of Sudeten German demands for minority rights.

The session followed 24 hours of almost continuous discussion of the nationality problem by Premier Milan Hodza, his government colleagues and Nazi-supported representatives of Konrad Henlein.

It was announced Hodza told the Sudeten German leaders he would have further negotiations in a few days upon his own proposed minorities statute and the Sudeten German demands. But statements from both camps indicated the Germans were hoping out for:

1. Equality of status between Czechs and Germans in Czechoslovakia.
2. Recognition of 3,500,000 Sudeten German population in Czechoslovakia as a legal entity.
3. Recognition of German territory as distinct from Czech territory.
4. Entire self-government in such territories.
5. Minority protection for Sudeten Germans living outside such recognized territory.
6. Reparation for damages caused to Sudeten Germans since 1918 by "unjust" measures.
7. Establishment of the principle of German officials for German territory.

8. The right of individuals to acknowledge their German nationality and their adherence to the German political ideology.

These would be more conciliatory than the eight-point program Henlein announced April 24, when he asked for termination of the Russian-Czechoslovak alliance and recognition of the Sudeten Germans' right to agitate for Nazi ideas in Czechoslovakia's German-inhabited districts, among other demands.

### Winnipeg Bond Theft

Winnipeg.—Police said they were investigating theft of \$10,000 worth of registered government bonds, taken from a Winnipeg Grain Exchange office recently. They refused to divulge the name of the office from which the bonds, including \$8,000 worth of negotiable papers, were missing.

## Will Continue Relief In Drouth Areas Until Crop Assured

Ottawa.—Relief in the drouth areas of Saskatchewan will continue until it is clear a crop will be harvested this year, Hon. R. G. Gardiner, minister of agriculture, told the House of Commons. He said this most likely would be early in July. At present it looked as though a normal crop will be harvested.

He was answering questions from western farmers on agriculture department estimates.

At this time last year, he remarked, it was clear the crop would be a failure and arrangements were being made for provision of relief throughout the summer.

Mr. Gardiner told E. E. Perley (Cons., Qu'Appelle) he had no knowledge of any compensation being paid to farmers who had lost livestock to government pastures during the winter. If any compensation was being paid it was by the Saskatchewan government on its own responsibility.

Rt. Hon. R. B. Bennett, Conservative leader, said he was glad to know relief in the drouth area could be ended early in July. He had feared farmers would have so little reserves of goods or credit relief would have to continue until the crop was turned into cash. Mr. Gardiner said this would be so in some cases.

If relief of this kind were ever needed again, said Mr. Bennett, it should be administered by a commission. It was useless for one government to spend the money raised by another. The Saskatchewan government was administering relief but was not responsible for raising the money. There was bound to be carelessness. He had heard of a blacksmith who had to work 15 hours a day to keep up with his business and who was on relief. He presumed the federal government would say that was the responsibility of the provincial authorities.

Mr. Gardiner said the federal government did take some responsibility

for such abuses. It had inspectors in the field and prosecutions were often launched in the courts.

It had been found relief was less costly the closer the administering authority was to the people. In districts where there was no municipal organization and relief was handled directly by provincial government officials the cost was higher than where municipal authorities handled distribution.

### European Wheat Crop

#### May Be Hundred Million Bushels Less Than Last Year

Washington.—The United States agriculture department, hunting foreign markets for United States wheat, reported that Europe's crop probably would be 100,000,000 bushels less than last year.

Agriculture Secretary Wallace said effect of this decline on purchases of United States wheat had not been determined. Agriculture and state department representatives, he said, are canvassing the situation.

The European survey did not include Russia. Wallace said greatest shortages were indicated in Italy and Spain, and added he was not disturbed by prospects of a wheat surplus of between 450,000,000 and 500,000,000 bushels in the United States.

### Rust In Kansas

#### Destined To Take Heavier Toll Of Wheat Than Expected

Topeka, Kas.—Black stem rust has developed extensively in Kansas wheat during the last two weeks, and losses caused by late frozes are becoming more apparent in south-central counties as harvest progresses, the federal and state departments of agriculture said.

The report said rust "seems destined to take a heavier toll of Kansas wheat than was expected earlier."

## Mr. Dunning Stresses Canada's Sound State In Budget Speech

Ottawa.—Canadians may look forward to a possible deficit of \$22,900,000 in their national accounts for the present fiscal year but they will not be troubled with new taxes. Many, not only farmers, fishermen, fur-farmers and those who build houses will secure relief from the sales tax on essential commodities.

The eight per cent. sales tax remains in operation but the list of exemptions is widened to include all building materials. The provision, it is expected, will cut building costs by eight per cent. Of benefit to farmers is the exemption on harness, harness parts and materials used in harness construction. Materials used in making gopher poison are also exempted. Feed for farm-bearing animals will not be taxed, nor materials for fixing fishermen's boats.

Delivering his fifth budget speech, Hon. C. A. Dunning, minister of finance, informed members of the House of Commons of the financial state of the nation. He found it sound internally but he was cautious in predicting the possible influences upon Canadian economy of world factors.

The budget was months later than usual owing to the prospect of including in it a new trade treaty with the United States. Negotiations at Washington are still proceeding and, while he would make no predictions as to their outcome, Mr. Dunning said Canada could not give to-day and bargain tomorrow. For this reason there were no tariff changes.

It was the first time since 1912 the national budget made no change upward or downward in customs duties. In that year there was a special reason as a new finance minister, Sir Thomas White, had just taken office and a tariff commission had just been organized.

Under somewhat similar circumstances with a treaty in the offing the 1932 budget contained only one tariff change. At that time the imperial economic conference was about to meet in Ottawa to draft the empire trade agreements and Rt. Hon. R. B. Bennett, Conservative leader, was minister of finance.

The projected deficit of \$23,000,000 for the present year compares with

an over-all deficit of \$13,775,000 for the year ended March 31, nearest approach to a balanced budget since 1929-30. Mr. Dunning expressed disappointment he had not achieved a balanced budget although last year he had forecast a possible deficit of \$35,000,000. Had it not been for drouth in Saskatchewan and the necessity of adding \$5,000,000 to annuity reserves he would have achieved his goal.

For the present year Mr. Dunning estimated expenditures at \$524,600,000 against an actual outlay of \$530,467,000 last year and revenues at \$501,700,000 against last year's returns of \$516,692,000, highest in Canada's history.

While he did not believe the deficit would be larger than disclosed by these figures it might be much smaller. If the western crop was good, if business revived in the United States and other countries and if the Canadian construction industry responded to the government assistance it would be.

Throughout his speech, Mr. Dunning stressed the soundness of Canada's internal economy and its susceptibility to influences from abroad. The major influences presently affecting it and likely to continue were business recession in the United States and dangers of war in Europe.

"The world itself is not in a healthy condition," he said, "and Canada's economic relations with the outside world reflect the disturbances beyond our frontiers."

"I see no reasonable hope of restoring normal trade relations except by a vigorous prosecution of the policy of tariff reduction through bilateral trade agreements; a policy for which this government has stood since its entry into office."

"For better or for worse the force of circumstances has eliminated at least for the present the alternative approaches of unilateral or universal action."

The government through agreements with the United States and the United Kingdom had already gone a long way in reducing trade barriers. "I do not propose to reduce tariff on its own, as neither the United States nor the United Kingdom was prepared to do this."

## NOTES AND COMMENTS

LAST WEEK a ratepayers meeting was held. Interest was much keener than that shown at annual meetings of ratepayers, when it is the rule that besides the council and the school board, the reporter and a half dozen people are present.

AT THIS meeting there were 150 indignant taxpayers who had posted appeals with the court of revision protesting against the 1938 assessment. Nearly all were most vociferous in deriding the trustees, some being to say the least lacking in courtesy in their remarks. While abuse was being heaped on them, it was amusing to reflect that less than eighteen months ago they were elected in preference to a school board which ratepayers were falsely told was guilty of extravagant administration.

IT SERVES to show how one year the plaudits of the crowd will be with you, and next year they are ready to crucify you. And after all it was a minority of school ratepayers who were voicing their disapproval. The remaining five or six hundred had no voice in the matter. The miners voted in the present slate and pushed out of office the board whom they approved of in going ahead and having the high school erected. Well, this is democracy, and the ratepayers have the privilege of electing whom they like as long as they act along constitutional lines.

IT HAS BEEN The Journal's contention for years that the interests of the ratepayers would be best served by having a proportion of business men on the council and the school board, instead of the mine-workers trying to monopolize the offices. Not that there is any more brains in one or the other, but it serves to balance the representation and makes for more impartial administration and freedom from undue influence. This fact is overlooked at election time, with the result that regrets are expressed when they are useless. Try and remember it next January. We all have to live together as neighbors, we are all interested, or should be, in economical administration and the securing of value for taxes, therefore why should there not be co-operation between business men and the miners? We all have to pay into the common fund when it comes to paying taxes.

IF EVERY Canadian taxpayer received a tax notice annually stating what he had to pay for Canadian National Railway deficits, he would surely raise a vociferous objection against continued losses. But he pays it indirectly, and because he doesn't know it, he doesn't raise a "holler." Sir Edward Beatty stated that under a plan of unification of the C.P.R. and C.N.R., a saving of \$75,000,000 would be saved annually. If this is possible, which President Hungerford of the C.N.R. states is an exaggerated estimate, then taxes are being paid for an extravagance the Dominion can ill afford.

THOSE who fear that unification would place the public at the mercy of one road overlook the fact that competitive transportation systems or methods have brought about the very condition the railroads now face. Even with only one railway company, that competition will continue. There are hundreds of miles of unproductive territory which have lines of both companies running through

them. This territory in itself would not suffer from elimination of a duplicating line, and such a condition cannot continue indefinitely. Proponents of the C.N.R. should agree to have the remedy applied rather than allow a continuation of profitless extravagance.

DEFIANCE of constituted authority and occupation of public buildings by unemployed will not solve labor problems of the idle men who have converged on Vancouver. Without doubt agitators urge the men in their defiance, magnifying their misfortune and encouraging the men to hang around instead of trying to find employment. If governments were to indefinitely tolerate such conduct, the burden of the taxpayers would be made more heavy than it now is. Governments and law enforcement agencies have to face unpleasant tasks at times. Politicians angling for votes try and make the unemployed appear as martyrs.

SYMPATHY is felt by the mass of public opinion for the unfortunate who despite all effort cannot get work, and relief is granted to those in need. On the other hand there is quite a large percentage who are not very keen on finding work as long as a tolerant public will give them hand-outs and self-seeking politicians will pile up unemployment relief taxes on the working people. There has to be moderation and common-sense in all things. Open defiance of the law alienates public sympathy. If we were all to smash other people's property as a protest against conditions we would be on a lower level than the savages.

## LETTERS TO THE EDITOR

(The editor is not responsible for opinions expressed in letters to the Press, and reserves the right to reject any communication submitted. Publication must not be taken as an endorsement of opinion or policies.—H.T.H.)

Coleman, Alberta,  
June 7, 1938.

To the Editor, Coleman Journal.

Dear Sir: Assuming that the cause of the recent tragedy was a stray bullet fired from a rifle in the hands of a junior, does it not behoove parents and citizens to do something to prevent the recurrence of such an act. The provincial law seems to be lax in regard to the use of firearms in the hands of youngsters, but a certain degree of blame, I believe, can be laid at the hands of the parents themselves. No youth should ever be allowed to go out with a rifle until he has been properly instructed and under supervision with regard to proper handling and rules for general safety. It is not an uncommon sight in this vicinity to see several lads out with .22 rifles, carelessly shooting along the outskirts of the town with no regard to direction, distance or inhabitants. They do not seem to realize that the little .22 rifle is a very deadly weapon, in fact men about town have been heard to say that a .22 bullet is fairly harmless. There is just one organization in the 'Crows' Nest Pass which is, and has been training girls in the care and handling of rifles, I refer to the Coleman Rangers. When such a movement as the Girl Guides recommend such a project, surely it may be considered worth while. Instead of ridicule and criticism for such a work, would it not be more intelligent to uphold the efforts that are being made? Why could not such a club be formed among the teen-age boys, to which they could go for necessary instruction and information?

If space permits, Mr. Editor, will you kindly print the safety first rules enclosed?

Thanking you, I am,  
Yours for safety first,  
Observer.

## TEN RULES FOR SAFETY FIRST

1. Never, never point a rifle at any person, whether it be loaded or not. It is the cause of many so-called accidents and it is a very rude act.
2. Never lean on your rifle, nor have it pointed at any part of your body.
3. Do not shoot on Sundays.
4. Do not shoot after sundown.
5. Do not shoot in the town limits.
6. Do not shoot in the vicinity of dwellings, nor in the direction of people.
7. Do not shoot along the highway, nor on the railway property, nor from a car, wagon or any vehicle.
8. Before shooting, scan the horizon to see if any one is approaching. Make sure that something will arrest the bullet, even though you miss your target.
9. Remember a .22 rifle is a deadly weapon, that a .22 short bullet travels at the rate of 975 feet per second and strikes with an impact of 61 foot-lbs.
10. Always practice Safety First.

## Letter on Debt Legislation

To the Editor of the Journal.

Sir:—This debt legislation, recently enacted by the Alberta government, which is designed to embarrass mortgage companies, insurance companies and trust companies, the financial institutions whom the government regards as the creditor class, will really affect practically all the citizens of the province and citizens outside the province. The majority of citizens carry life insurance. Anything which tends to weaken or impair the financial standing of the life insurance companies must necessarily tend to weaken or even destroy the security upon which policy holders have hitherto relied.

It is not time that individuals should awaken to the fact that insurance companies may not be able to pay at the crucial time, which may cause untold humiliation and actual want, and lodge their protest with the Dominion government rather than entirely rely on the efforts of public bodies, such as the Chamber of Commerce, to have this infamous legislation disallowed! If the insurance companies are forced out of business and the policy holders, how many people would have to seek government relief?

And what about the women investors whose husbands or fathers had sufficient faith in the province to invest their capital in land mortgages? As one of the women investors, I have been, notwithstanding my willingness to meet all reasonable adjustments, reduced in circumstances. I am now confronted with the possibility of having my entire capital wiped out. I am writing a personal letter to the Minister of Justice at Ottawa, setting out the facts of my case, and would ask that those in similar circumstances would co-operate and do the same to help one another.—Yours,  
A WOMAN MORTGAGEE

# Why is Life Insurance So Safe?

**Answer.**—Because the institution of Life Insurance is built upon a sound actuarial basis, and upon the investment of the accumulated funds of policyholders in loans to governments and municipalities—for building homes and schools—for improving farms—for constructing good roads and transportation systems—for developing industries and public utilities.

**Question.**—How is the safety of these funds guaranteed?

**Answer.**—By the security of the governments, municipalities and properties upon which the loans are made—and the financial responsibility of the borrower.

**Q.**—Are there restrictions as to what type of investments Life Insurance companies may make?

**A.**—Yes, all investments are subject to strict governmental regulation.

**Q.**—What is the total amount of Life Insurance funds invested in Canada?

**A.**—More than Two Billion Dollars.

**Q.**—Has Life Insurance in Canada fulfilled every guarantee 100 cents on the dollar?

**A.**—Yes, even through wars, epidemics and worldwide depressions.

This is the ninth of a series of messages sponsored by Life Insurance Companies operating in Canada. The tenth, to appear in two weeks' time, will discuss how women and children benefit from Life Insurance.

## WHERE DOES ALL THE MONEY COME FROM?

MORE than four and one-half million depositors in Canada have "money in the bank."

They are satisfied to leave their money on deposit because Canada's chartered banks are ready and able to pay back promptly every cent when the depositor calls for it.

These deposits in the chartered banks total roughly \$2,262,000,000—approximately 10 per cent, of which they carry in cash—in other words Bank of Canada money or "legal tender."

Some people do not fully understand banking operations and might ask:

1. What have the banks got to represent our deposits if they do not have it all in cash?
2. How can the banks repay our deposits, over \$2,262,000,000, with the amount of cash they hold?

The answer to No. 1 is: Look at any bank balance sheet and you will see for yourself that a bank owns more than it owes. That is to say—if all of its depositors were paid off and all of its other debts paid, a balance would be left belonging to the shareholders.

That should answer your first question satisfactorily. And now for No. 2:

Look again at a bank balance sheet and you will see that in addition to the cash deposits, the bank owns assets which are convertible into cash, or which can be used to borrow from the Bank of Canada.

Experience has taught banks the amount of cash it is necessary to carry to meet ordinary day to day demands, and also the proportion it is necessary to carry in gilt-edged quick assets which can be liquidated to meet even any extraordinary demand. Banks know that it is absurd to expect all depositors to call for their money at the same time.

That would be like saying that if everybody got sick at the same time there would not be room in the hospitals to take care of them.

Or that if everybody who travels by street car decided to travel at exactly the same hour, there would not be enough cars to carry them.

Or that if every person who carries life insurance died on the same day all the claims could not be met.

Or that if every sea were drained dry there would be no ocean liners.

Such statements are meaningless when you expose them to the cold light of commonsense.

Where, then, does all the money come from? That question can best be answered by asking this one: Who owns it—and how do they get it?

Addressing ourselves to 4,740,000 depositors we answer: "This money is yours. You own it. When you call for it, you get it. When you ask any existing Canadian bank for it, do you ever fail to get it promptly?"

We ask you, too: "Do you regard your deposit as figures in a book?"

## THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience.

## School Taxation Still Topic of Keen Discussion

Suggested That Auditor Prepare Complete Comparative Statements of 1937 and Estimated Expenditure for 1938 to Show Necessity of Increased Taxation.

In order to acquaint ratepayers of the school district with expenditures of last year and estimated expenditures for this year, as submitted by the trustees, the following comparison will be useful:

The biggest item, teachers' salaries, in 1937 was \$24,343.66. For 1938, it is estimated at \$25,000.00.

There should be a reduction shown this year, as it is expected there will be one less on the high school staff of five, reducing the high school total salaries of \$9,010 to \$7,390.00. There are approximately 100 pupils of high school age, which will make an average of 25 for each teacher.)

In 1937 the item for officials' salaries, secretary, assessor, auditor, etc. was \$2,520.50. For 1938 it is estimated as \$1,260.00 (not including approximately \$2,000 for 1938 assessment) to which is added for dentist \$1000. (The contract is at present held by Dr. R. K. Lillie)

In 1937 there was paid for repairs \$14.46 and for the new high school \$22,858.45. For furniture \$1,058.97.

The item for taxi service, bringing children in from the west end of the district, last year was \$726.75. This year there is an increase, the amount being \$1,140.00. There are other payments, which on the 1937 financial statement showed a total of \$68,167.96.

The estimated total cash payments for 1938 as shown on a statement published in The Journal on May 26, amount to \$47,513.70.

On Jan. 1, 1937, the statement showed a balance on hand of \$13,155.82.

This year's estimated expenditures are \$20,654.20 less than in 1937, largely accounted for by \$22,858.45 paid on account of the high school in 1937. It is in view of the much less money required this year that taxpayers are asking why it is necessary to make a marked increase in taxation. Of course it must be remembered there was a credit balance shown on Jan. 1, 1937, (above) which apparently did not exist this year.

The Journal suggests that a complete comparative statement be prepared by the board's auditor in order to place before the ratepayers a clear explanation of the reason for increased taxation. It would save much misunderstanding. In view of the necessity of levying for more money, the ratepayers should be given more information.

In addition to expenditures for 1938, there was mention of the cost of a chemistry laboratory at \$3,000. This is not shown in any statement so far. In justice to ratepayers they should know the complete details, they having to pay the bills. Who authorized the expenditure?

In addition there was \$1750.00 expended on repairs to a house on the school property, making a total expenditure of approximately \$5,000 if equipment to the laboratory is added. Expenditures of this nature are sufficiently heavy to require a vote of ratepayers before being sanctioned, otherwise taxes might be increased to such an extent that they will become far too burdensome for working people to pay.

Well-Known Young People Married at St. Luke's Church—Will Live at Heaton Ranch, North Fork.

## Pretty Wedding At Blairmore

St. Luke's church at Blairmore was the scene of a pretty wedding on Saturday, when Kathleen, daughter of Mr. and Mrs. E. C. Costick, of Bellevue, was married to George F. Heaton, of the Heaton ranch in North Fork district, whose parents have lived there for many years. The bridesmaid was Dorothy Costick, younger sister of the bride, and the best man was Mr. D. E. O'Sullivan, a friend of Mr. Heaton. Roses, daffodils and tulips gave a fine touch of color, and three flower girls, Willoughby and Margaret Utley, and Betty Darby, the latter of Calgary, looked very pretty.

During the signing of the register the wedding music was played by Mrs. R. Upton. Many friends of the family were present, the church being unable to accommodate them. Following the wedding service, which was conducted by Rev. John Rayson Hague, Anglican rector of Coleman and Blairmore, a reception was held at the home of Mr. and Mrs. Costick, in Bellevue. It is of interest to note that the bride's twin sister was recently married in Victoria. Both took a very active part in athletics and field sports, winning several awards and championships. Good wishes of a large circle of friends of the family are extended to both brides.

WORLD HAPPENINGS  
BRIEFLY TOLD

Sweden marked the 80th birthday of King Gustav by establishing a national fund for fighting infantile paralysis.

Two research workers reported a slow, steady spread of undulant fever was making it one of the major disease threats in the United States.

The British Columbia government collected \$344,271 in forest revenues last year, larger than any year since 1929. Hon. A. Wells Gray, lands minister, said in his annual report.

Malcolm MacDonald, colonial secretary, told the House of Commons the government is considering sending more troops to Palestine to maintain order.

While nearly 900 revellers danced on, an armed bandit held up Miss Mabel Berry, cashier of the Palais Royale dance hall in Toronto, and escaped with \$350.

Only man to swim the English Channel both ways—France to England, 1927; England to France, 1934. E. H. Temme is retiring after 20 years' competitive swimming and water polo.

Don McLeod of Winnipeg, believes he holds the long-distance record for model aircraft. His plane with a gasoline engine no larger than a bowl of a pipe, flew from Winnipeg to Starbuck, Man., a distance of 33 miles, recently.

The Canadian Tuberculosis Association's 38th annual meeting in London, Ont., learned sales of Christmas seals in Canada to aid tuberculosis control work, increased 15 per cent last year over the previous year and brought \$155,000 in revenue.

Disfranchisement of relief recipients after they had received public assistance for two years was advocated by W. C. McKinnell, Manitoba supervisor of municipalities, in an address before the western district union of Manitoba municipalities.

## The Hawker Hurricane

Fastest Fighting Plane In Air Force  
Service Belongs To Britain

Britain has now in commission the fastest fighting machine in service in any air force. It is the Hawker Hurricane, the plane that made the trip to Edinburgh at 408 miles an hour, but that has been kept on the semi-secret list until just recently. Now it has been issued to the squadrons.

On its record-breaking trip it was helped by a strong tail wind, and its real top speed is not known to any outside the Air Ministry and the pilots, but observers guess it can do between 300 and 350 miles an hour. This would give it 280 miles as cruising speed for patrol work. Its tank capacity will allow it to do 700 miles without refuelling, a record achievement for its kind.

It can climb to 15,000 feet in six minutes and to 30,000 feet before the rate of climb drops to 100 feet a minute. It weighs 2½ tons, tucks its undercarriage beneath it when it takes to the air, carries six Browning machine guns and is considered a handy little thing to have around when bombs come over. The British people saw it in action on Empire Air Day—Toronto Telegram.

## Carried Out His Promise

Admiral Of Roosevelt Ate Editorial  
Page Made Into Cake

Robert Jones, an admirer of President Roosevelt, thought newspapers were too critical of his policies. He announced that he would eat the first editorial in a Dallas newspaper that spoke kindly of him. The Dallas Journal carried an editorial praising a proposal of Mr. Roosevelt. Jones took the entire editorial page to a chemist, had it converted into glucose and dextrin and baked into a cake. In the presence of a party of friends, including Lynn Landrum, author of the editorial, he ate the cake.

The production of oranges and grapefruit is extending in Palestine. Last year citrus fruits accounted for 83 per cent of the country's exports. Already this year more than eleven million cases have been sent away, about a million more than last season.

Most of the watches used in aircraft to-day are of Swiss make. These instruments must function perfectly in temperatures changing from plus 33 to minus 10 in a few minutes.

Five billions in gold and a billion in diamonds have been extracted from the African continent.

More than 21,000 of a total of 22,450 homes in Bournemouth, Eng., have radios.

## Get Rid Of Flies

## Not A Single Fly Should Be Permitted To Live

When you consider the millions of flies that may be bred if even one single female house-fly is allowed to mature, it is obvious to what extent these carriers of "typhoid" and other disease germs are a menace to any community where they are permitted to multiply.

Flies are no respecters of persons. The baby in the millionaire's home or the workman's cottage are equally in danger if proper care is not exercised to keep flies from entering the home. Flies frequent the filthiest feeding places outside the home, then, if allowed inside, carry dangerous germs to feeding bottles, liquids, foods, everything that is left exposed.

The important point then is to "clean-up" thoroughly wherever potential breeding places exist—out-of-doors, around the house. And, to make doubly sure, screen all windows and doors and cover all milk and food wherever exposed. If these precautions were followed by everybody, it would go a long way to solve the fly problem. But, we are most of us apt to be thoughtless of others, perhaps, and so the flies have a new lease on life.

If flies do get into your home, a clean, quick way to kill them as they come is to place Wilson's Fly Pads in convenient places around the house till fly-time is definitely over. Just a little care and thoughtfulness for the other fellow is the way to make the health authorities dream of a fly-less community come true.

## CAPE FROCKS ARE SLIMMING

By Anne Adams

Fashion cries "Bravo" to Anne Adams' utterly charming new dress design, called "Cape-Frock" 4830! How cleverly it gives the figure new slenderness with its striking panels! The centre bodice sections are eased into the pointed waistline of the front panel to produce an unusually flattering softness. Make the cape in self fabric—a filmy sheer or a pliable floral crepe (or a fine line, if you want contrast), with the neckline bow to harmonize. Whether you choose the cape or the brief sleeves, you'll have a frock to wear everywhere, and so easy to sew that you'll really relish your task. Pattern 4830 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 4½ yards 39 inch fabric, illustrated step-by-step sewing instructions included. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

## Bought Personal Things

When Indians received treaty money at the Pas, Man., most of it was spent for personal adornment. The women bought many "bobbin pins," rings, bright-hued handkerchiefs, cheap eye-glasses and some finger-nail polish. The men went in for silk socks, neckties and rubbers to wear over their moccasins.

## Denied Use Of Mails

In the 12 months ending May 31, instructions were issued by the Post-office withdrawing mailing privileges in Canada from approximately 1,450 persons and 50 organizations. Hon. W. D. Euler, Acting Postmaster-General, said in answer to a question in the House of Commons.

About 106 boys are born for every 100 girls.

—Politken, Copenhagen.

## Motor Accidents Appalling

106,000 Lives Lost In United States  
In 1937

The National Safety Council announced accidents in the United States claimed 106,000 lives in 1937—a total more than twice as large as the number of American lives lost in the Great War. Injuries disabled 9,900,000 persons, at least one million in every four family.

The calculable costs of all accidents ran to \$3,600,000,000. Motor vehicle accidents caused 39,500 deaths, 1,360,000 persons injured and an economic loss of \$1,700,000,000.

## Kept Money In Country

Because he made his money in this country, Caesar Gerard, 57 years old, directed in his will, filed for probate at Newark, New Jersey, that his entire estate, estimated at \$16,600, should go "to the United States of America." Gerard was born in Italy.

Fully 15,000 trailers, accommodating over 50,000 people, are expected to hit the holiday trail in England this summer.

## He Showed Them

## But Effort Of American Aviator Put Him In Hospital

Clyde Pangborn, the aviator, has been working in England this past year for Sir Cunliffe Owen at the British subsidiary of the Canadian Car & Foundry. . . . Some weeks ago Pangborn walked through the factory and saw four laborers trying to lift a car onto a truck. . . . "Look," he offered, "watch how Americans do it in America." . . . Pangborn placed his hands under the rear fender, bent his knees, and heaved mightily. . . . As a result, he's in the hospital now—and hereafter will be required to use a cane. Pangborn's heave broke his Achilles tendon.

## Reaping Gold

Samuel Camilli, Uniontown, Pa., planted tomatoes and reaped—gold. He was setting out the plants when his spade turned up three \$20 gold coins. Then he dug up the tomato plants. Old-timers told him a house on the site burned 30 years ago and \$3,000 in gold and paper money was lost.

CENTRE SERIES  
OF CHEMISTRY IN EVERYDAY LIFE

BY DR. H.G. LITTLE.

## From Wood Pulp To Transparent Film

Of the many products made by the chemist using cellulose as a raw material, none has had a more rapid or sensational rise than transparent cellulose film, best known by the trade-name "Cellophane." Made by a

## Cellulose Comes From Wood

process invented by Brandenberger, a Swiss chemist working in France, and first used chiefly in making women's hats, this material is now used for literally hundreds of different purposes. Although first made in Canada in 1922, the growth of transparent cellulose film has increased very rapidly.

Transparent cellulose film and rayon are true sisters, both being the children of cellulose from the spruce tree and cotton linters. In the case of rayon, a cellulose solution made by treating purified wood pulp or cotton linters with caustic soda and carbon bisulphide is forced through the microscopic holes of a "spinneret" into a chemical bath which changes the tiny streams of "liquid cellulose" back into filaments of solid cellulose. In the manufacture of transparent cellulose film the viscous solution is forced out into the chemical bath through a long narrow slit instead of a spinneret, and the result is a thin film of cellulose. Further chemical and physical operations—bleaching, washing, etc., leave the completed film transparent, sparkling, strong, flexible, odorless, oil-proof, air-proof, gas-proof and germ-proof.

While transparent cellulose film made in this way, and coloured with dyes, is used as a wrapping material, chemists soon realized that a material should be found to make this material moistureproof in order to extend its usefulness as a wrapper for

goods which quickly become dry and stale.

After several years of experimental work in the laboratory, moistureproof film was perfected which led to a revolution in packaging. When wrapped in this moistureproof cellulose film spread in wafers in cakes and other bakery products were greatly reduced because this moistureproof film preserved them. Meats appeared in this new wrapper, thus insuring freshness and cleanliness. The use of moistureproof cellulose film spread in wafers and other perishable foods, until to-day the average grocery store contains dozens of products kept fresh by it. It is generally conceded to-day that this transparent film is an aid to public health since food stuffs, textiles and other items wrapped in it are not readily contaminated with disease germs.

In addition to its use for wrapping all kinds of articles, transparent cellulose film is used for many other purposes. In the form of narrow ribbons it is woven into attractive fabric for curtains. Fifty thousand yards of sparkling cellulose film were used to make the moonbeams in the motion picture presentation of "A Mid-Summer Night's Dream." In the theatre it has been used for costumes, in the radio world for making sound effects, by surgeons as an outside dressing so that the progress of wounds might be observed, and on the farm as a cover for early plants

## SUNDAY SCHOOL LESSON

JUNE 26

## SHARING SERVICE WITH THE LIVING CHRIST

Golden text: And they went forth, and preached everywhere, Mark 16:20. Lesson: Mark 16:1-8, 14-19, 19:10. Devotional reading: Psalm 16:1, 2, 7-11.

## Explanations And Comments

He is Risen! Mark 16:1-8. It was very early on the first day of the week that a little group of women, Mary Magdalene, and Mary the mother of James, and Salome, went to the tomb of Jesus carrying spices for the anointing of his body.

Heavy-hearted were they, without hope, as they approached the sepulchre, saying among themselves, "Who shall roll us away the stone from the door of the tomb?"

On entering the sepulchre the women found it empty. They were amazed. Luke says that they were frightened, and bowed down their faces to the earth. Luke 24:4. "Be not amazed," the young man cried: "Ye seek Jesus, the Nazarene, who hath been crucified: he is risen; he is not here."

"Behold the place where they laid him," continued the young man, the tomb keeper. Peter and John is described in John 20:5-7. "But go": you have gazed long enough at the empty tomb; go and make known to the disciples and especially to Peter the wonderful fact that its Occupant has arisen, and that he will meet them in Galilee as he has promised them. See Mt. 26:32. Trembling and astonished the women silently fled. Matthew, Luke and John report that they delivered the message to the disciples.

The Great Commission, Mark 16:25. To the eleven disciples Jesus said, "Go ye into all the world, and preach the gospel to the whole creature." We have stood on the shore of a great river and watched the mighty burdens which it bears so easily on its surface, and then I thought have gone back to the river's small beginning which we call its source. As we contemplate the victory of Christ in all the world we are interested in going back to the source. It is in these words that we call the Great Commission.

## Research May Have Remedy

## To Make Harmless The Dust Which Affects Miners

South Wales authorities, like those in some of Canada's hard-rock mining centres, are worried over the high incidence of silicosis among the country's coal miners, especially those employed below ground in the anthracite industry.

Analysis of medical certificates granted those suffering from the dread disease—a lung condition induced by inhaling dust which frequently leads to tuberculosis—shows 4.2 per cent of those working in anthracite mines contract the disease. The rate for all underground workers in the United Kingdom is 3.1 per cent, and for South Wales 1.3 per cent.

Dr. David Jones, Professor of Mining at the University College, Cardiff, told the South Wales Institute of Engineering 580 silicosis certificates had been issued in a little more than six years among the 21,335 underground anthracite workers, 1,515 among 116,465 workers in all South Wales mines, and 1,738 among 627,886 underground workers in the whole United Kingdom.

Dr. Jones suggested the possibility of reducing the hazard by minimum use of explosives in mines, containing their use is one of the major causes of noxious dust. He also drew attention to beneficial results attained through use of a respirator to protect workers from dust.

(Research work carried on at the McIntyre gold mine at Porcupine, Ont., in co-operation with the Banting Institute at Toronto, indicated mine dust carrying silica which dissolves in the lung, inducing the disease, may be rendered harmless by spraying aluminum dust into the mines.)

## Helium From The Air

## Say German Scientists Have Perfected A New Process

German scientists have perfected a process for extracting helium gas from the air. Dr. Siedler, gas expert, informed a congress of German scientists. The non-inflammable gas is needed by Germany for safe operation of her dirigibles. The United States, he said, had practically monopoly on production of natural helium.

## Must Have A Public

Personally, says the Windsor, Ont., Star, we never expect to see a street car service that the people will praise, a telephone service that it will not abuse, a gas service that it will not accuse, a railroad service it will not criticize. But, nevertheless, you can't get along without a public.

In ancient Egyptian funeral processions, it is said, there were no less than 20 species of the flowers grown in that day.

**Health LEAGUE OF CANADA**  
presents  
**TOPICS OF VITAL INTEREST**

## TESTED RECIPES

By Katharine Baker

## GOLDEN APPLES

It is generally believed now that those golden apples in the old Greek legends were really oranges, the oranges of Spain which were remote and mysterious wonders to the Greeks at the time.

The causality with which they tossed the heavens from one to another in those days seems amazing but no more amazing than the causality with which we obtain oranges to-day would have seemed to the ancient Greeks. This one rare fruit comes to us now from much greater distances than the Greeks ever conceived of. Besides the fruit from the United States, we get beautiful oranges from Palestine and the Orient.

Here are two easily-made desserts of quick-cooking tapioca cream, containing eggs, milk, tapioca and oranges to make a wonderfully nutritious dish. Among other food values, oranges bring to scolding point one of the few elements which milk lacks, so altogether the balance is nearly perfect.

## Orange Tapioca Cream

1½ cup quick-cooking tapioca  
½ cup sugar  
1½ teaspoon salt  
4 cups milk, scalded  
1 egg yolk, slightly beaten  
1 egg white, stiffly beaten  
1 cup orange juice  
4 oranges, sections free from membrane

Combine quick-cooking tapioca, sugar, salt, egg yolk, and milk in top of double boiler and stir enough to break egg yolk. Place over rapidly boiling water, bring to scolding point (allow 5 to 7 minutes), and cook five minutes, stirring frequently. Remove from heat and add cold milk. Add small amount into egg white; add to remaining tapioca mixture and blend. Cool—mixture will be stiff. Place in dishes and cover with tapioca mixture. Garnish with additional orange sections. Serves 8.

## Chantilly Orange Tapioca

1½ cups water  
1½ cup quick-cooking tapioca  
½ cup sugar  
1½ teaspoon salt  
1 cup orange juice  
1 tablespoon grated orange rind  
½ cup cream, whipped  
Place water in top of double boiler and bring to a boil over direct heat. Combine dry ingredients; add gradually to water and bring to a brisk boil, stirring constantly. Place immediately over rapidly boiling water and cook five minutes, stirring occasionally. Remove from heat and add cream—mixture clears and thickens as it cools. When slightly cool, add orange juice and rind. Chill; fold in cream. Place lightly in sherbet glasses. Just before serving, garnish with vesperine ½-inch shreds of orange rind, free from all white membrane. Serves 6.

## Historic Sites

## Perpetuating Events And Work Accomplished By Previous Generations

The annual meeting of the Historic Sites and Monuments Board of Canada, held in Ottawa recently, brings into prominence once again the work done by this organization. Canada's story has not been a prosaic one, and the chapters are punctuated by events of the most stirring kind. The board sees to it that these events do not fade out of the public memory. During the past 20 years more than a thousand places where Canada's growth flared into more than ordinary drama, have been examined by the board; 256 of them have been labelled "decisive" events, and have been commemorated by a tablet or monument. Several museums have been established. During 1937, 18 sites were marked throughout the Dominion. There are still about a hundred sites worthy of such recognition.

This work is carried on quietly and unobtrusively, but it is no less important. It is good for the rising generations to know about the wise and brave deeds of the men and women who have gone before. The present is built upon the past, and if the traditions of heroism and foresight are kept in memory, Canada's future can be as glorious as her past! —Winnipeg Free Press.

**sweetens the breath!**

Help improve your personality with Wrigley's Gum. Keep your teeth white, breath sweet, by using Wrigley's Gum daily—as millions do. The children also love the delicious refreshing flavor of Wrigley's Double Mint. Take some home today. **c-3**

## WHAT HO!

—By—  
**RICHARD CONNELL**

By Arrangement With Thomas Allen, Publisher, Toronto.

### CHAPTER XIII.—Continued

"I warn you, Punder, that defamation of character is a dangerous pastime," barked Sir Peter. "There are laws—"

"You should know all about the laws," sneered Punder. "You've kept just inside 'em long enough. So come off your high horse, Pete Tyler. You and your crowd are going to listen to some home truths."

Sir Peter and the others sat down, looking sulky and apprehensive. Ernest sat down looking blank.

"I wanted P.P.P. and you knew it," Punder fumed.

"That's not so," declared Sir Peter. "How should I know your plans?"

"I suppose you expect me to believe that you haven't got wind of the fact that I'm organizing E.F. and D.S.," said Punder.

"Never heard of it," said Sir Peter. "Don't even know what it is."

"Empire Food and Drink Syndicate," said Punder, "and when it goes through—and it is going through, 90 per cent. of all the consumers of ale, bacon, jam and other staple foods in Great Britain and her colonies will have to pay tribute to E.F. and D.S.—and that means yours truly."

"Really? And you wanted Purico Pork Products for a link in your chain?" Sir Peter said. "Well, why didn't you come to me? You knew I held a controlling interest in P.P.P."

"Because I knew you'd come to me," said Punder. "Well, you fooled me. You knew I'd drive a hard bargain so you rigged up this dummy auction and palmed it off on this gull—"

"He jerked a thumb at Ernest—and now that he's got P.P.P. what he's going to do with it?"

"His plans may surprise you, Punder," said Sir Peter. "Mr. Bingley is not alone in this. He has associates—Mr. Otis G. Wyncoop—for example—"

"Hah!" ejaculated Punder. "I've heard of Wyncoop. Dashed good sausage man, too."

"And," went on Sir Peter, "I have been given to understand that unlimited capital is available in the States to back a corporation which will make your little E.F. and D.S. look like a corner grocery."

Punder said "Hah," but it was a weak and worried "Hah."

"Since Mr. Bingley has P.P.P. and I have an engagement, I bid you good-day," said Sir Peter and made ready to leave.

Then Ernest took the brake off his tongue.

"Wait," he said.

"Well?" said Sir Peter.

"You've made a mistake," said Ernest. "I had no intention of buying P.P.P. or A.B.C. of whatever it is for two and a half million dollars—"

"My dear Mr. Bingley," said Sir Peter, and he spoke with frigid finality. "you made a bargain, in the presence of witnesses, and I shall hold you to it. These gentlemen will testify to your bid and its acceptance."

Dr. Van Tromp, Mr. Silver and Sir Mark Newsome, turned suddenly hostile.

**For Your Preserving**

**ALBERTA'S**

**Use It This Year**

tile, indicated that they were prepared to tell a judge and jury that Ernest was guilty of breach of promise, and assorted torts.

Then they strode out behind Sir Peter leaving Ernest in the clutches of Hubert Punder. Ernest would have ducked out through the door had not Punder plugged it with his pouge.

"Talk," said Punder.

Ernest resumed his imitation of the Sphinx.

"I'll say something then," said Punder. "Just two words: How much?"

Ernest was as voiceless as a newt.

"You can't do anything with P.P.P. and you know it," raged Punder. "This is just another piece of Yankee piracy. Well, speak up. What's the reason?"

Ernest did not speak up.

"You and your precious combine!" cried Punder. "You and your unlimited capital! Going to buck me, hey? Going to snatch British concerns from under Punder's nose, hey? Well, you can't kick Punder around, see—"

Ernest began to see something quite clearly. He began to see that in that off-hand, informal way natural to men used to the tenet of Big Business that credit is based on reputation, Sir Peter and his fellow conspirators had sold him a property for two and a half million dollars, and now Mr. Punder wanted to buy it from him with no more ceremony than if it were a pound of dog-biscuits.

Of late Ernest had faced the music so often that he would spin round at a piccolo note. He faced the music now, and it was sweet music. A hard, painful smile came to his face. Mr. Punder saw it. Mr. Punder said, "Well, have you made up your mind just how much you're going to hold me up for?"

Ernest retained his smile but no syllable fell from his lips.

"I'll give you a quick profit of five thousand pounds," said Punder. "Not bad for a day's work, hey?"

Ernest felt that it was indeed adequate compensation for his efforts. Five notes at a thousand pounds a note certainly made him the highest paid noddle in the world. However, he did not nod. He shook his head.

"Ten thousand. Take it or leave it," said Punder.

Ernest got out a pair of words. "No go," he said.

Punder's color went from cerise to plum.

"How much do you want?" he snarled.

"Twenty."

"Bare-faced robbery!"

"Twenty."

"You're a crook."

"Twenty."

"You're a scoundrel."

"Twenty."

"All right," said Mr. Punder. "Twenty it is."

A slow train carried Ernest back to Penryn. On the way he took out his forgotten lunch. The cheese and pudding had become one gummy blob. He ate the mixture anyhow. It tasted like ambrosia to him.

### CHAPTER XIV.

"Father's late for breakfast—and on his birthday, too," said Lady Rosa Bingley. "That's not like Father. He must be in the dumps."

"In the dumps," thought Ernest, came under the head of understatements as a description of the feelings of a man about to be ousted from his ancestral home. He watched Rosa as she drank her morning tea. She looked so pertly and seemed so gay.

"You're a good sport, Rosa," Ernest said.

"I? Why?"

"Acting the way you're acting."

"Father's birthday," she said. "We can get out the sackcloth and ashes later. More tea, Ernest?"

"Yes, thank you."

As she poured the tea, Rosa said, "When you were in London I took a walk. I went down to our oak tree and sat in the branches. All by myself. What do you think I found?"

"Squirrels!"

"No."

"Acorns?"

"Yes. Also I found that somebody had carved our initials in the tree—R and E inside a heart."

"Must have been the pookies," said Ernest.

"No doubt. Oh, I say, I hear Father's step. We must sing 'Happy Birthday to You.'"

"What shall I call him?" whispered Ernest hurriedly. "In the name I mean. I can't sing 'Happy Birthday, dear Earl.'"

"Why not just call him Father?" said Lady Rosa and her cheeks matched the strawberry jam which she was anointing a muffin.

The Earl of Bingley entered the dining room, smoked for a last potting, and showed no outward signs of inner dolour.

**I found**  
**sweetening**  
**my morning**  
**cereal with**  
**BEE HIVE Syrup**  
**aids**  
**digestion.**

**TRY IT TOMORROW**

Rising Lady Rosa and Ernest sang, "Happy Birthday to you, Happy Birthday to you, Happy Birthday, dear Father, Happy Birthday to you."

The earl grinned and bowed.

"Thank you, thank you, thank you," he said, and took his place at the head of the table.

"Great age—sixty," he remarked. "A man's just old enough to laugh at his youthful follies and just young enough to want to repeat 'em. Pass the corded eggs, please."

He picked up his napkin.

"My word, what's this?" he exclaimed, holding up some flat packages. He opened the first. It contained a necktie from Rosa, the second a women buy, dove gray with lavender posies on it.

"A million thanks, my dear child. It's just what I needed," said the earl, and put it on at once. The second present was a pair of gaudy braces and a card inscribed, "Many happy returns. C. Crump."

"Thanks most awfully, Crump," said the earl. "I needed these—and how! Been holding my bags up with twine."

He opened the third gift, an envelope. He stared and stared at its contents with that look of extreme surprise known in motion pictures as a "Take-em."

"Tea!" he shouted. "Give me tea!"

"Father! What is it?" cried Rosa.

"The notes! Punder's notes. Marked 'Pail in Full.' Tea! Tea!"

"Oh, Father, how wonderful," exclaimed Lady Rosa, and began to cry.

The earl looked as if he were going to cry too, but Crump thrust a cup of steaming tea before him, and that useful national beverage enabled his lordship to hide his feelings.

"Talking of miracles!" said the earl, coming from behind his tea-cup. "Ernest, my dear young scallawag, if I live to be a hundred, and I fully expect to, I can't thank you enough for what you have done."

"I? Sir Ernest."

"I don't mean Donald Duck," said the earl. "Who but you could have been so generous? Besides you're no good at hiding things, you know. You look as innocent as a mouse caught red-handed in a cheese-monger's bag, that is, if one can catch a mouse red-handed. Stop blubbing, you big baby, and eat your corded-eggs—this last to Rosa."

"I'll blub-bub-bub if I want to," returned his daughter.

"Blubber on, my little gypsy sweetheart," said the earl. "But you might cease firing long enough to thank Ernest."

"I do thank Ernest," said Rosa, smiling through her tears. "I thank you, Ernest, with all my heart."

"Forget about it," said Ernest. "It wasn't much to do for you—I mean—since I'm a sort of Bingley, too—you might say."

"I do say," said the earl. "You're a doubled-barreled, high-calibre, true Bingley—and no mistake. I never tasted better corded eggs. Have some more, Ernest."

"Thank you, sir."

"And," said the earl, lading out the eggs, "I'll pay you back. I can't say when. Fact is we've barely enough to keep up the old place as it is. However, if the apple crop is good, and the hens lay, I think we'll be able to pay you the interest."

"Never mind the interest," said Ernest.

"Oh, go get yours!" measured for a hank and a hank," said the earl. "Of course I'll pay the interest. Blast it, there I've gone and spilled eggs on my nice new tie."

(To Be Continued)

## Indian Problem

To Set Aside Areas In North Where Natives May Pursue Ancient Vocations

New methods of dealing with Canada's increasing Indian problem were outlined in the House of Commons by Hon. T. A. Crerar, minister of resources and superintendent general of Indian affairs.

A program setting aside huge areas in the north country where Indians may pursue their ancient vocation of trapping and hunting undisturbed by the white man is one of the projects now under way.

It will also be the endeavor to educate Indians along lines enabling them to earn their living in their own environment and at work for which they are adapted, rather than in occupations more natural to the white race.

Rt. Hon. R. B. Bennett, opposition leader, declaring he was proud of the manner in which Canada had cared for her Indian wards, urged educational efforts along lines that would ensure the Indian an opportunity of supporting himself in the manner for which he was best adapted.

Mr. Crerar said plans were already under way in the Northwest Territories to stock large areas with beaver and to restrict those areas to the use of Indians in an effort to revive the fur trade.

Inroads by white trappers and hunters had almost destroyed the hunting and trapping by which Indians used to support themselves.

Other efforts to improve their lot would be to train Indians as guides and forest workers, in woodcraft and beadwork, so authentic Indian craft would be available for purchase by tourists. They were also being trained as guides and attendants in national parks.

In recent years Indian schools had trained young boys and girls in the ways of the white race. They were taught to use modern electrical appliances and to observe the amenities of modern life in the cities, the minister said.

Indian scholars on leaving such schools returned, in the majority of cases, to their reserves, where this knowledge was of no benefit to them, with the exception of what they had learned of health and hygienic habits.

Mr. Bennett suggested such school graduates often, on returning to the reserves, found themselves at a disadvantage as compared with their contemporaries who had remained at home.

"In recent years, thanks to education and medical care furnished by the federal government in increasing measure, the Indian population had started to increase and was now approximately 118,000 all Canada."

The population was increasing at the rate of about 1½ per cent. A similar problem would eventually be found in respect to the Eskimos in the western Arctic, Mr. Crerar forecast.

## Everest Wins Again

This Year's British Climbers Forced Back By Monsoon

The Kalimpong (Bengal) correspondent of the London Daily Mail reported that the British 1938 expedition to scale Mount Everest had been forced to retire to the Kharta Valley to recuperate.

All seven members are safe, it was said, but the majority are weak from the after-effects of influenza.

An expedition, headed by W. W. Tilman, did not penetrate far beyond the 23,000-foot "jumping-off" point for the final climb to the peak, the dispatch said.

An early southwest monsoon, responsible for the failure of many previous attempts, ripped across the face of the mountain, making further climbing impossible. It was not believed that another attempt would be made this year.

## The Russian Way

Because he "destroyed" 600,000 mulberry trees, Y. Kamoweff, the former head of the Armenian silk trust, was sentenced to die in front of a Russian firing squad. How did he destroy all those trees? Actually the trees were destroyed by silkworm parasites. How killing the head of the trust will improve conditions is more than we can understand.

## Prefers Motorcycle

A motorcycle-riding grandmother, Mrs. Marie Blasius, 77, of Idaho Falls, Idaho, has gone on a 1,000-mile trip. Mrs. Blasius prefers motorcycles to automobiles "because they ride easier and you can see better." She was a side-car passenger with her son.

Resort hotels often name "A" on the register after names of persons "favorably known to the management." "B" after home-looking strangers and "C" after those whose status is in doubt.

## NEW, LOW PRICES ON FIRESTONE TIRES

Here's your opportunity to get Firestone Tires at bargain prices, for Firestone Standard, Sentinel and Truck Tires and Tubes are now greatly reduced in price. These new low prices are subject to change without notice—take advantage of them to equip your car today with safe, new Firestone Tires and save money. See your local Firestone Dealer now.

Firestone SENTINEL TIRES AS LOW AS \$7.50

## Canadian Artists

Wider Representation In National Gallery Is Urged

Wider representation of Canadian artists in the national gallery at Ottawa was urged in the House of Commons by Opposition Leader Bennett.

Mr. Bennett thought several ranking Canadian artists had been overlooked and that there were some pictures on display that did not "dignify" the gallery. He also suggested one picture labelled "Van Dyck" which he thought should have the word "after" placed in front of the artist's name.

Works Minister Cardin agreed Canadian artists should be encouraged to every possible extent. He would refer Mr. Bennett's remarks to the board of trustees.

"The last time I visited the gallery," Mr. Bennett said, "I certainly found a dearth of pictures by one or two artists who, I think, might fairly be classified as ranking Canadian artists."

There is a substantial number of Canadian artists who are not at all adequately represented in the gallery. On my last visit I tried to make effective criticism of some pictures there but did not succeed.

"Certainly they do not dignify the gallery, whereas some of the paintings by those who are not represented would ornament almost any gallery in the world. It would be unfair to particularize."

## For A Better Balance

Unwarranted Pessimism Is Always A Destructive Force

In what might be referred to loosely as "Pre-depression" days much was heard of the tremendous resources, remarkable accomplishments, and promising future of this Dominion. Since that time, a more gloomy outlook has apparently become fashionable on the part of a good many persons. The accomplishments are overlooked, the achievements minimized, and only dark days are seen ahead.

It seems unfortunate that a more balanced outlook could not be maintained. Unbounded optimism has undoubtedly played a part in creating some of the problems Canada is facing today—but the opposite outlook of unwarranted pessimism is certainly as destructive, if not more so.

—Frederick Gleaser.

## His Busy Week

On his week-end call recently a commercial traveller was about to receive a small order, when he started searching through his pockets.

"What have you lost?" asked the customer.

"Pencil," replied the traveller, still searching. "Can't think where I left it. I know I had it on Monday."

The word "bedlam" comes from a corruption of the name Bethlehem, a lunatic asylum in London.

Greek residents of Australia presented to the government a fund collected to purchase a military plane.

## Trooping Of The Color

Canadians Among Thousands Who Cheered King George At Historic Ceremony

Thousands, including Canadians, swarmed the sun-lit Mall to cheer the King as he rode with the Dukes of Gloucester and Kent to take the salute at the historic ceremony of the Trooping of the Color on his "official" birthday.

His Majesty, mounted on a chestnut charger and wearing the scarlet and gold uniform of Colonel-in-Chief of the Scots Guards, with the blue ribbon of the Order of the Garter across his tunic, led the glittering cavalcade from Buckingham Palace to the Horse Guards Parade. The Duke of Gloucester was the uniform of Colonel of the Scots Guards and the Duke of Kent that of Colonel of the Royal Fusiliers.

Queen Mary and Princesses Elizabeth and Margaret drove to the palace with a queen's escort of Life Guards. As they drove from the palace foreign military attaches and members of the council saluted, and the crowd burst into cheers as the carriage rounded the Victoria Memorial.

Queen Elizabeth was unable to attend. Her Majesty was at Windsor, recovering from a cold.

## Can Be Overdone

Pastures Likely To Be Overimproved By Too Much Grazing

One way to clear brush and weeds from land is to turn in goats enough to keep the bushes stripped bare and the weeds clipped close to the ground until the roots have starved, says A. T. Temple, of the United States Soil Conservation Service. "But," he adds, unintentional use of practically this same plan is responsible for the impoverishment and erosion of many desirable pastures."

Many farmers, he points out, graze so long a season that the tops of the good grass plants have no chance to feed the roots and store food reserves necessary for growth. The result is disappearance of the best grasses and a lowering of grazing in quality and quantity. The remaining thin cover of grass or weeds holds less of the rain that falls. As a consequence, such close-cropped pastures are likely to suffer erosion by wind and water.—St. Thomas Times-Journal.

## Is A Mystery

Find Human Bones Believed To Be Remains Of A Giant

John Work, head clerk of the Ontario department of mines, said he had received a letter from Cochrane, Ont., telling of the discovery near there by a trapper of a pile of human bones, a bag of decomposed rocks and a geologist's magnifying glass in a four by six-inch metal box.

"I believe it will be possible to trace the dead man's identity through this box," said Mr. Work. "From its description it sounds like the equipment used by the Hudson's Bay Company geologists of 50 years ago."

#### LOCAL NEWS

Rev. C. Noel-Holmes has been appointed by Bishop Sherman to take charge of the Coutts-Foremost mission, succeeding Rev. John Hague, recently appointed to the parishes of Coleman and Blairmore. Mr. Hague is spending this week in the Coutts field piloting Mr. Holmes over the field and introducing him to the people of the district.

George Derbyshire's new house on the hillside is completed and further improvements will be made, including the building of a verandah so that a view of the mountains can be enjoyed in the quiet leisure of the evening. The house has a commodious basement where George will be able to indulge in his hobby of woodworking.

Colonel W. S. Mallandine, well-known public-spirited old-time resident of Creston, was a visitor here over the week-end, accompanying Mr. Lorne A. Campbell, president of McGillivray Creek and International Coal Companies, who was here on one of his periodical business trips. The colonel paid a friendly visit to The Journal office and the editor enjoyed a brief chat on things in general in East and West Kootenay.

The funeral of Mike Kovach, 17 years, was held on Saturday, service being in Holy Ghost church. He was born in Coleman, and the family moved to a farm at Burnis. His mother died in 1929, on the farm, and a brother was killed by lightning some years ago. The pall-bearers were John Michalsky, John Sekina, Bernard Yakubic, Angus Yandresak, John Leskosky, S. Chala.

Mr. and Mrs. J. D. MacAuley of Drumheller announce the marriage of their daughter Jean Isabel to Mr. Harold Houston McVeigh on June 13 at Scurbourn United church, Calgary. A reception was held at the Palmer hotel. The bride it is of interest to note was born in Coleman, during the time her father was with the International Coal & Coke Co. They lived in the building now known as the Anglican church rectory.
